Projects

Beacon United Live Chat & Platform Enablement (Banking)	May 2025 - Till Date
<i>Fidelity Information Services, LLC.</i>	

Description-

Beacon United is a secure, real-time customer support and engagement platform used by leading banking clients under FIS. The platform integrates advanced Glia Digital Customer Service (DCS) capabilities—including live chat, audio calls, video calls, co-browsing, and agent-assisted support—directly inside the mobile banking application. The project focuses on delivering seamless and reliable digital interactions between bank customers and support agents, with strict compliance to banking-grade security and performance standards. Along with live chat features, the project also includes Platform Enablement, supporting backend workflows, bug fixes, feature enhancements, release support, and continuous integration improvements.

Roles & Responsibilities -

- Participate in cross functional meetings to review Functional Requirements. Participating in DSU, Sprint Planning, Client Sync, and Retro meetings.
- Understand design and implement high quality code as per guidelines.
- Conduct code reviews and manage Git branches.
- Building advanced Glia live chat, audio, and video calling features for mobile banking apps.

- Integrated Glia with FIS customer applications, enabling real-time secure support communication.
- Analyzing and fixing iOS and Android build issues with deep debugging.
- Managing Bitrise CI/CD pipelines including Alpha/Beta build versioning.
- Maintaining Glia SDK versions in Artifactory and ensuring compatibility.
- Solving QA issues, performing stability checks, and end-to-end regression.
- Supporting Enablement platform bug fixes, feature development, and backend coordination.
- Ensuring seamless release delivery with continuous client collaboration.

Technology Used -

React Native, Ionic angular, Glia SDK, LogRocket and Bitrise Tool

MobileOSS (Telecommunications)

July 2024 - May 2025

Motorola Solutions Inc.

Description-

MobileOSS would provide Field Tech access to create, update, and resolve incidents and change requests directly from the field in line with the NOC. Service Desk and Field Team's process flows. Motorola provides security using Okta login authentication, and this app gets user location and automatically runs country-wise for Canada, the UK, and Australia. It offers automatic sync of offline data to online data, so it's more comfortable both offline and online. You can easily update the tickets and upload images, documents, and signatures against them. Its settings have more features; you can change date formats, languages, and notification alert sounds.

Roles & Responsibilities -

- Understand design and implement high quality code as per guidelines.
- Conduct code reviews and manage Git branches.
- Schedule a team standup, get updates from the team, discuss them with project managers, assign tasks to team members, and share the status report and monthly reports with the manager.
- Code delivery, Release management including building iOS App Store and TestFlight.
- Participate in cross functional meetings to review Functional Requirements.

Technology Used -

React Native
